

Single Size Pneumatic “pillow style” Pipe Plugs

These large diameter plugs are manufactured with a high grade urethane coated fabric for strength and durability. Urethane materials are generally resistant to most chemicals. Because of the coated fabric construction these plugs can be rolled up to a very small size for easy installation. The minimal weight of the urethane coated fabric makes handling these plugs fairly easy. Designed for single pipe sizes the pillow style plugs are very economical.

Each plug is equipped with dual inflation ports for inflating while monitoring pressure. A specially designed pressure relief valve helps ensure the plug is not over-inflated.

Nominal Size	Product Code	Pipe Use Range		Inflation Port (FPT)	Gauge Port (FPT)	Overall Plug Length (inches)	Bypass Size (inches)	Inflation Pressure (psig)	Maximum Back Pressure		Shipping Weight (pounds)
		Minimum Pipe Diameter (inches)	Maximum Pipe Diameter (inches)						Water Head (feet)	Air (psig)
